What is International Student Health Insurance

Ajou University requires all international students to purchase insurance to protect them from unexpected healthcare expenses in the event of an accident, as well as to manage their health while staying in Korea. Also, all international students are required to enroll in an insurance plan in line with the Korean government's policy of mandatory health insurance for international students. Ajou University has made an arrangement with Seimnuri Insurance Company so that students can quickly and conveniently receive health insurance benefits when they receive medical attention at designated medical facilities.

If you do not enroll in a plan, you will have difficulty receiving various verification and certification records from the school and participating in E-classes. So please enroll in an insurance plan.
