

Young Scientists Summer Program

IIASA offers **PhD student fellowships**
to undertake a summer project on a topic
related to the IIASA research agenda.

www.iiasa.ac.at/yssp

Annually, from 1 June to 31 August, IIASA hosts up to 50 doctoral students from around the world in its Young Scientists Summer Program (YSSP).

If you are an advanced graduate student, take your research to the next level and apply to the YSSP to:

- **Access** a global research network of over 3,500 scholars
- **Benefit** from working alongside pioneering researchers from around 50 countries
- **Conduct** your own mentored research related to your PhD and the interdisciplinary IIASA research agenda - culminating in a publishable paper
- **Enjoy** the vibrant social life that comes with being part of the YSSP
- **Live** in Vienna, which has repeatedly been named the most livable city in the world

To apply for more information, visit:

www.iiasa.ac.at/yssp

IIASA is an international research institute based near Vienna, Austria. A global leader in systems analysis, IIASA conducts policy-oriented, multidisciplinary research into challenges that are too large or complex to be solved by a single country or discipline. These challenges, which include **climate change, energy security, and sustainable development**, must be solved by international cooperation.

Communication with the relevant program representatives is strongly encouraged at the earliest possible stage, and before submitting an application.

“The IIASA YSSP offers a unique opportunity to collaborate with those who are directly involved with setting the stage for current debates on pressing environmental challenges.”

Bertram De Boer, YSSP 2019
